Load carriers and systems
for efficient logistics processes

	TBX	Volume	Payload	External dimensions (LxWxH)	Internal dimensions (LxWxH)
On castors (ø125)	410	410 Liter	500 kg	580 x 803 x 1.806 mm	431 x 625 x 1.425 mm
	600	600 Liter	500 kg	757 x 818 x 1.773 mm	609 x 659 x 1.416 mm
	725	725 Liter	500 kg	757 x 948 x 1.773 mm	604 x 809 x 1.407 mm
	795	795 Liter	500 kg	757 x 948 x 1.936,5 mm	604 x 811 x 1.570 mm
On pallet	900	900 Liter	700 kg	797 x 1.198 x 1.788 mm	611 x 1.025 x 1.444 mm
	1000	1.000 Liter	700 kg	797 x 1.198 x 1.888 mm	611 x 1.025 x 1.544 mm
	1070	1.070 Liter	700 kg	797 x 1.198 x 1.988 mm	611 x 1.025 x 1.644 mm
	1170	1.170 Liter	700 kg	797 x 1.198 x 2.138 mm	611 x 1.025 x 1.794 mm
	1500	1.500 Liter	700 kg	1.219 x 1.219 x 2.007 mm	838 x 1.041 x 1.676 mm

6 facts why our insulated containers TBX improve your logistics processes!

Isotec TBX insulated containers: The sustainable and economical solution for transporting chilled and frozen products. We are the market leader for logistics solutions and are always at your side as an expert. Read this white paper to find out everything you need to know about our insulated containers and let 6 facts convince you how our containers make your logistics processes easier.

Fact 1: Transport optimisation

Alternative to refrigerated trucks

You can use our insulated container TBX to transport frozen or fresh goods along with non-perishable items. The containers are transported in the same compartment of a regular truck, without the need for refrigeration. The flexibility of transporting chilled and non-chilled goods can save you a lot of money compared to expensive refrigerated trucks.

- ✓ Delivery routes are optimised
- ✓ Better utilisation of the cargo space
- ✓ Number of trucks required is reduced (cost saving for your fleet)

Your benefit at a glance

- ✓ Secure cold chain up to 24h
- ✓ For use in your refrigeration logistics
- ✓ Safe and stable refrigerated transport of fresh and frozen goods
- ✓ Combined goods transport on one truck
- ✓ Extra light container
- ✓ Ergonomic handling
- ✓ Easy to clean
- ✓ Easy to repair
- ✓ ATP and HACCP certified for transport in food logistics

Fact 2: Sustainability

Enormous reduction of CO₂ emissions with the use of our TBX

Reusable eutectic plates are used in conjunction with the insulated container. By dispensing with dry ice and refrigerated vehicles, fuel consumption and pollution are significantly reduced. This contributes to sustainability and the reduction of pollution.

- ✓ Reduction of CO₂ footprint:
approx. 33 t per year per truck
- ✓ Dry ice replacement
- ✓ Savings in fuel costs up to approx. 22.000 €
per year per truck*

*Assumption with 240 l consumption per week

Fact 3: 100% Secure Cold Chain

With our eutectic plates we guarantee you a secure cold chain

The freshness of your foodstuffs is maintained throughout the entire transport period through the use of the eutectic plates. Over a period of up to 24 hours, the insulated containers keep the original temperature of the goods constant from picking in the distribution centre to delivery to the shop.

- ✓ ATP/HACCP certified
- ✓ No loss of goods

Fact 4: Maximum flexibility

Our extremely manoeuvrable castors give you maximum flexibility for deliveries in the city centre

The ergonomic pull handles of the TBX make handling much easier during logistics processes and even the loading and unloading of a fully loaded truck can be done quickly and safely. The goods can be stored in the container until they are stocked on the shelves.

- ✓ High flexibility in small branches
- ✓ Suitable for deliveries to City Stores

Fact 5: Reutilization

Durable container usable for many years

Due to its long lifetime, the insulated container can be reused for at least 6 years without the need for stretch film, pallets or roll containers to pack or transport the refrigerated goods.

- ✓ Protection of the goods
- ✓ Saving of additional packaging (stretch film etc.)

Fact 6: Cost reduction

Save a lot of money with our TBX

The use of insulated containers leads to constant savings in different phases of the logistics process.

- ✓ Cost savings for the entire fleet
- ✓ CO₂ & dry ice
- ✓ Fuel costs

Over 190 years of experience and know-how in the manufacture of load carriers

GEBHARDT is considered a leading company in the logistics industry. We are very keen to pass on our knowledge and know-how to our customers and to work together constantly on improving existing logistics processes. We are always available to provide you with advice and support in a personal consultation.
